Abstract

Provide a concise summary of the study including purpose, methods, results, and conclusions (150-250 words)

Chapter 1: Introduction

Background of the Study

Discuss the context and importance of the research problem

Statement of the Problem

Clearly state the research questions.

1. What is... ?
2. How does... ?

Objectives of the Study

General Objective

- To investigate ...

Specific Objectives

- To determine ...
- To analyze ...

Hypotheses (if applicable)

- **H0:** There is no significant relationship between...
- **H1:** There is a significant relationship between...

Significance of the study

Explain who benefits and how.

Scope and Limitations

Define the boundaries of the study.

Chapter 2: Review of Related Literature

Related Studies

Summarize previous research

Related Literature

Discuss theories and concepts.

Conceptual Framework

(Insert diagram if needed)

Chapter 3: Methodology

Research Design

Describe the design (e.g., descriptive, experimental).

Data Collection

Get a data set from www.kaggle.com

Table 1: Descriptive Statistics of CS Students

Student ID	Name	Gender	Age	GPA	Major	Interested Domains	Projects	Future Career	Python	SQL	Java
1	John Smith	Male	21	3.5	Computer Science	Artificial Intelligence	Chatbot Development	Machine Learning Researcher	Strong	Strong	Weak
2	Alice Johnson	Female	20	3.2	Computer Science	Data Science	Data Analytics	Data Scientist	Average	Strong	Weak
3	Robert Davis	Male	22	3.8	Computer Science	Software Development	E-commerce Website	Software Engineer	Strong	Strong	Average
4	Emily Wilson	Female	21	3.7	Computer Science	Web Development	Full-Stack Web App	Web Developer	Weak	Strong	Strong

Student.ID	Name	Gender	Age	GPA	Major	Interested.Dom	Projects	Future.Career	Python	SQL	Java
5	Michael Brown	Male	23	3.4	Computer Science	Cybersecurity	Network Security	Information Security Analyst	Average	Weak	Strong
6	Laura Lee	Female	22	3.9	Computer Science	Machine Learning	Image Recognition	Machine Learning Engineer	Strong	Average	Weak

Variables Description

Explain dependent and independent variables

Data Analysis Techniques

- Descriptive Statistics
- Inferential Statistics
- Machine Learning Models (if applicable)

Chapter 4: Results and Discussion

Descriptive Statistics

Visualization

Model (Example: Linear Regression)

Interpretation

Discuss findings in paragraph form

Chapter 5: Conclusion and Recommendations

Conclusion

Summarize key findings

Recommendations

Provide practical suggestions

References

Use APA format.

Appendices

Appendix A: Code
